

Signode Industrial Group Announces Participation in Industrial Pack 2019

Signode Industrial Group makes the bulk transportation of goods possible through their development and distribution of protective packaging products.

Glenview, Ill., USA, March 18, 2019 — Signode Industrial Group, a leading manufacturer of products that optimize end-of-line packaging operations and protect products in transit will be exhibiting at Industrial Pack 2019. This two-day event will be held from March 27-28, 2019 at the Cobb Galleria Centre in Atlanta, Georgia. Industrial Pack, the only dedicated event in North America for the industrial, transit, reusable and protective packaging industry, will bring together buyers and suppliers to address the operational building blocks within the global packaging supply chain. The event is free to attend.

“Since its inception, SIG has been dedicated to innovation. Participating in events like Industrial Pack 2019 helps us identify the challenges within the industry as well as foster relationships and collaborate with key players that inspire our innovation,” said Mike Stein, Director of Global Marketing & Innovation at Signode Industrial Group.

“The team from Signode Industrial Group looks forward to sharing our innovative products with visitors to Industrial Pack 2019. We also appreciate the opportunity to share an example of our AIST packaging lab process with the industry. It is important that customers who rely on end of line packaging solutions to protect their goods in transit learn about how these solutions can be optimized and tailored to their specific requirements. The Pack Testing Live area provided by Industrial Pack offers a unique opportunity to demonstrate the value of testing in the selection of packaging solutions.”

As the Transit Packaging Division of Crown Holdings, Signode is comprised of a portfolio of well-known packaging brands where a commitment to innovation and meeting customer needs has resulted in a comprehensive line of protective packaging products that protect goods throughout the distribution cycle.

The following **brands** will be on display in **Booth #521** at **Industrial Pack**:

Angleboard – Corner protection

Down River – Load securement solutions

GaleWrap – Oriented stretch film

LOCK N’ POP – Organic adhesive designed to “lock” products in place

Multi-Wall – Custom-designed protective packaging

Plastic Packaging – Plastic sheet packaging dividers

Reddi-Pac – Laminated paperboard packaging products

Shippers Products – Dunnage airbags

Signode – BXT3 Battery-powered handheld strapping tool

Representatives from each product line will be on hand to provide information on their portfolio as well as answer any questions visitors may have. In addition to products on display, SIG will also participate in **Pack Testing Live**. This unique event within an event allows suppliers to put their products through simulation and non-simulation performance tests to demonstrate their effectiveness. This year, Signode will feature its International Safe Transit Association (ISTA) certified rough handling test. As an integral part of their **ADR Packaging Laboratory**, it

duplicates the actual conditions products experience during the shipping and handling process.
See the **Pack Testing Live** schedule for Signode's assigned time.
